**ANGLECUT**

## Fielders AngleCut

AngleCut is faster, cleaner and greener. It's precut to your measurements and delivered to the building site ready for installation.

Fielders AngleCut is delivering advantages that you simply can't ignore.

AngleCut is saving teams up to 30% on installation when compared to manual onsite cutting methods - As confirmed by BlueScope's independent comparison.

Simply supply accurate measurements and the Fielders AngleCut team will provide a complete precut roofing system for increased efficiency.

This means that off cuts are virtually eliminated resulting in dramatically reduced clean up time.

All these benefits are supported by a national specialist network available to assist your team in reaching greater efficiency.

### The Fielders AngleCut Benefits at a glance

Features	Benefits
