FIELDERS PREMIUM PROFILES

ARCHITECTURAL CLADDING SYSTEMS

Fielders are proud to present five exciting profiles that have been designed to bring a high end look to the roof and walls of your next project.

Whether it's for a conventional roofing application or a bold statement for a feature wall, the Finesse® range injects texture and depth, creating an eye catching finish to your project and transforming monotonous metals to stunning steel designs.

The Fielders Finesse Range of architectural facades have been rigorously tested to ensure compliance with Australian Standards for both Cyclonic and non-Cyclonic conditions. Fielders unique, full scale, NATA accredited laboratory testing, ensures you can be confident of not only the outstanding visual appeal of the Finesse® range but its performance as well.

Neo Roman®

The inspiration for the Fielders Finesse range

Fielders Neo Roman® profile has been around for many years. With the flexibility of a wide range of material finishes, including COLORBOND® steel Metallic and Matt finishes, it is a traditional profile that is equally suited to contemporary designs as well as stately heritage buildings. Most commonly used in Z600 Heritage Galvanised, the distinctive profile can be found in every major Australian capital city thanks to Fielders.

Available in 275mm or 475mm pan widths

Old Government House Brisbane

Architect: Andrew Ladlay Architect

Builder: E Chapman & Sons

Roofer: Talbot & Lemberg

1564m² of Z600 Heritage Galvanised Steel
in Neo Roman®

Situated in the heart of Brisbane's CBD, cradled by the city's Botanic Gardens and Brisbane River, Old Government House is the most historical building in Queensland.

Recognising this importance, Fielders modified their Neo Roman® profile from a single pan to a two pan profile; precisely duplicating the building's existing profiles.

The result is a high quality finish expertly crafted using Fielders unique products.

Shadowline™ 305

Play of light across the façade

As the sunlight changes throughout the day, the distinctive Shadowline™ 305 profile creates depth and movement across the façade. The deep pans and prominent outlines can be installed vertically or horizontally as a wall cladding or can be installed down to a one degree pitch in a roofing application.

Available in 305mm pan widths

SA Drill Core Reference Library

Project name:

South Australian Drill Core Reference Library

Profile: Shadowline™ 305

Architect: Thomson Rossi Architects

Builder: Hansen Yuncken

Contractor: Cladding & Roofing Contractors Pty Ltd

2500m² of Shadowline™ 305

COLORBOND® steel Monument® colour

Located within Adelaide's newly revitalised Tonsley Precinct, the \$32.2 million South Australian Drill Core Reference Library was designed to bring together more than 7.5 million metres of drill core material.

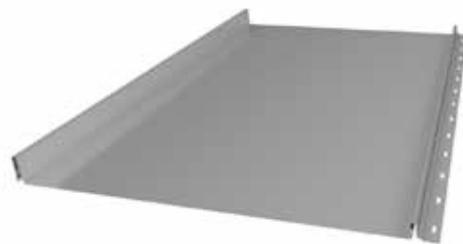

2500m² of Shadowline™ 305 was chosen due to the walling profile's sleek and stylish modern look, which melds perfectly with the Tonsley Urban Design Guidelines. Looking for a cladding panel that was rhythmic and evocative of geological formations, Shadowline™ 305 profile was the ideal material for the project, complementing the urban design strategy set out for the site.

Prominence™

A real attention grabber

With its elegant flat pans and ease of installation, Fielders Prominence™ is a rare mix that both the specifier and the builder can appreciate. As with all the profiles in the Fielders Finesse® Range, Prominence™ is available in any number of finishes including COLORBOND® steel Monument® Metallic or Surfmist® Matt.

Available in 265mm or 465mm pan widths

The National ANZAC Centre

Architect: Peter Hunt Architects

Builder: BGC Constructions

Roofing Contractor: A B Roofing

Fielders Prominence™ was chosen to give the building its bold and gallant appearance, while allowing for simple and manageable installation required to achieve the building's opening deadline. The panels were delivered to site and then formed over three different angles, wrapping around the top and the bottom of the building.

180m² of Fielders Prominence™ roofing and wall panels in COLORBOND® steel Woodland Grey®, was used as the main focal point for the building's exterior wall.

Boulevard™

The look without the cost

For all projects that necessitate an uncluttered and smooth look, Fielders Boulevard™ presents the perfect design solution. A contemporary express joint wall cladding that is available in a wide range of colours and finishes, it is sure to enhance the aesthetic appeal of your next project.

Available in 285mm or 485mm pan widths

Aria Apartments

Architect: Loucas Zahos Architects

Builder: Datong

Roofer: Alien Roofing

900m² of Fielders Boulevard™ in 0.55BMT, made in COLORBOND® steel Monument®

Located in the heart of Adelaide's buzzing restaurant district, the \$36 million Aria Apartments development on Gouger Street is one of the CBD's newest and most exclusive residential addresses.

Fielders Boulevard™ was chosen by architects, Loucas Zahos, due to its ability to provide a clean and modern finish to the lower exterior of the building. The flat recessed joint of the material was essential in creating a smooth effect that harmonised with the blue-tinted glass façade of the upper levels.

Grandeur[®]

Second to none

Fielders Grandeur[®] has a unique curving capability not easily achieved with all cladding profiles, allowing for exceptional results. With clean lines for a striking finish, Grandeur[®] is available in a wide range of colours and finishes to separate your next project from the rest.

Available in 325mm or 525mm pan widths

Lords House Project

Architect: DC Architecture

Builder: DC Architecture

Contractor: James Henry Roofing

The impressive versatility of Fielders Grandeur® is perfectly showcased in this project. Asked to recreate the façade of the Press Box at Lords; the Home of Cricket in England, in the Hills of South Australia Fielders Grandeur® was the natural choice.

Specified in ZINCALUME® steel Grandeur® was expertly fixed by a specialist European contractor who emulated the design and helped Fielders service another satisfied customer.
